PROFESSIONAL SUMMARY

Detail-oriented Full Stack Python Developer with technical expertise across Python, Django, MySQL, HTML5, CSS3, and modern frontend frameworks like React.js. Adept at building responsive user interfaces, implementing secure user authentication workflows, and designing relational databases. Proven capability in managing MySQL databases using Django ORM, executing clean backend logic, and leveraging standard version control platforms within development lifecycles.

TECHNICAL SKILLS

Programming Languages:	**Python, JavaScript (ES6+)**
Backend Development:	Django, Django REST Framework, RESTful APIs
Frontend Development:	HTML5, CSS3, Bootstrap, React.js
Databases:	MySQL
Tools & Platforms:	Git, GitHub, Postman, Visual Studio Code

TECHNICAL PROJECTS

Employee Leave Application and Approval Portal

Technologies Used: Python, Django, HTML5, CSS3, MySQL, Git

- Developed a role-based leave management web application for customized employee and manager access workflows, boosting administrative processing efficiency by 25%.
- Implemented end-to-end employee functionalities including leave application request, dynamic search, modification, and cancellation.
- Created an automated manager approval module to review, process, and track leave balances, reducing manual verification time by 30%.
- Integrated a relational MySQL database utilizing Django ORM, writing optimized data logic that maintained structural data consistency across multiple core operational tables.
- Designed and constructed responsive, cross-browser compatible front-end layouts with HTML5 and CSS3 to enhance user accessibility.
- Deployed robust CRUD operations tied directly into structural tracking mechanisms to log real-time leave state changes.

Student Records Management System

Technologies Used: Python, Django, HTML5, CSS3, Bootstrap, MySQL, Postman

- Developed a centralized, high-performance web dashboard designed to seamlessly manage institutional student datasets for 500+ student profiles.
- Implemented administrative authentication protocols and secure role-based access controls to defend system endpoints and user access boundaries.
- Engineered fully functional search, view, modification, entry, and deletion (CRUD) systems for student profile metrics, reducing data handling errors by 20%.
- Designed a relational database layout in MySQL mapped through Django ORM layer workflows to preserve transactional data integrity.
- Constructed modular, lightweight frontend interfaces with Bootstrap to streamline user navigation controls and form layouts.

INTERNSHIP & PROFESSIONAL TRAINING

Python Full Stack Development Training **6 Months**

Softlogic Systems

- Completed intensive technical training program focused heavily on standard Python syntax rules and Django architectural conventions.
- Gained hands-on experience structuring relational data constraints, query profiles, and database performance workflows using MySQL.
- Constructed modern, functional web application features bridging backend RESTful API controllers to componentized frontend modules, validating endpoints using Postman.

EDUCATION

Secondary School Leaving Certificate (SSLC) **2016**

Akshaya Academy Matric Higher Secondary School

Academic Performance: **81.0%**

Higher Secondary Certificate (HSC) **2018**

Akshaya Academy Matric Higher Secondary School

Academic Performance: **68.4%**

Bachelor of Engineering in Electronics and Communication Engineering **2018 - 2022**

M.Kumarasamy College of Engineering, Karur

Academic Profile: Cumulative CGPA: **7.4** / Aggregate Percentage: **70.3%**

CERTIFICATIONS

- Python Full Stack Development Certification – **IBM Certified**
- IBM HTML, CSS & JavaScript Certification – **IBM Certified**
- PCAP – Programming Essentials in Python – **Cisco Certified** (Aug 2021)
- Programming for Everybody (Getting Started with Python) – **Coursera Certified** (Oct 2020)
